Adam Zuabi

Java Software Engineer

Arnhem, Gelderland, Nederland

Samenvatting

Backend Software Engineer with strong expertise in Java and Spring Boot, experienced in building scalable backend systems and microservices architectures. Skilled in API design, system integration, and performance optimization. Worked with complex domain-driven systems, focusing on reliability, data consistency, and efficient data processing. Comfortable working in distributed teams and handling production-level challenges. Passionate about continuous learning and delivering high-quality, maintainable solutions.

Ervaring

ilionx

Java Software Engineer

mei 2024 - Present (2 jaar 1 maand)

Amersfoort, Utrecht, Netherlands

Dutch Board for the Authorisation of Plant Protection Products and Biocides

Java / Kotlin Backend Engineer(via ilionx)

mei 2025 - Present (1 jaar 1 maand)

Worked on a large-scale government system for Ctgb, focusing on the management and publication of plant protection products and biocides.

- Developed and maintained backend services using Java, Kotlin, and Spring Boot within a microservices architecture
- Worked with a complex domain model involving products, authorisations, uses, and regulatory data
- Integrated multiple services including OpenSearch indexing pipelines
- Designed and implemented search-related enhancements by optimizing indexing strategies and filtering logic
- Improved data consistency and synchronization flows between different application layers

- Troubleshoot and resolved complex issues related to Hibernate/JPA, entity lifecycle, and data integrity
- Collaborated within a distributed team environment and contributed to system stability and performance improvements

Tech stack: Java, Kotlin, Spring Boot, Hibernate, Docker, PostgreSQL, OpenSearch, AWS

PinkRocade Healthcare

Java Software Engineer (via ilionx)

juli 2024 - oktober 2024 (4 maanden)

Апелдорн

Developed and implemented a new travel expense module using Java and Spring Boot. Integrated the travel expense module with SAP systems via REST API, ensuring seamless data exchange.

Future Code Solutions

Full Stack Engineer

juli 2020 - mei 2024 (3 jaar 11 maanden)

Arnhem-Nijmegen en omgeving

Throughout my experience building applications, I have developed several webshops and mobile apps, I have also implemented APIs and integrated them with external systems for multiple clients. My primary technologies of choice for these projects were Laravel, Flutter and Springboot.

Be Informed

Back End Engineer

oktober 2022 - februari 2024 (1 jaar 5 maanden)

Apeldoorn, Gelderland, Netherlands

As a software engineer, my responsibilities encompass developing new features with Java 11, conducting unit tests, and resolving bugs. Additionally, SQL queries are created as required, and JPA is utilized to maintain application functionality. This is all done within the context of an Eclipse-based application.

I also play an active role in the architecture process, contributing to the drafting of requirements and translation of these into comprehensive use cases and diagrams, to ensure successful implementation of software.

CaseWare Nederland

Full Stack Engineer

maart 2022 - oktober 2022 (8 maanden)

As a software engineer at Caseware, my contributions spanned multiple projects. Responsibilities included development of a mobile application for both IOS and Android using Flutter. Additionally, involvement in bug fixing and new feature development was a core responsibility. This involved the utilization of Java 11 and composition of unit tests. In light of the product's web-based nature, extensive work was done on writing end points in JEE and integrating external systems with the application via REST API.

Belastingdienst

Back End Developer

februari 2020 - juli 2020 (6 maanden)

As a software developer, I bring expertise in back-end development using Java and JPA, complemented by a robust background in unit testing, software architecture, functional design and technical design.

United Engineers

Database Administrator

2013 - 2014 (1 jaar)

Cairo, Egypt

Responsible for designing, developing, and maintaining complex MS SQL databases for various applications. Skilled in data modeling, schema design, and data validation. Experienced in optimizing database performance, troubleshooting issues, and collaborating with development teams. Proficient in documentation, data dictionaries, and end-user training. Continuously exploring new technologies to improve scalability and performance.

Syrian Telecom

Software Developer

2012 - 2013 (1 jaar)

Damascus

Developed a scalable and maintainable web application using PHP, adhering to coding best practices. Enhanced website performance by analyzing and optimizing database queries.

Opleiding

HAN University of Applied Sciences

Bachelor's degree, Informatica (Software engineering) / Hogere opleiding

Software engineer · (september 2017 - januari 2021)
